# **Gemstone Handmade Semi Precious Natural Agate Stone Coffee Table Top with Stainless Steel Stand.**

*Handcrafted Black Crystal Agate Table Top (Size 36 x36x2 cm). This Agate was mined from a quarry in INDIA. This product is a mosaic. Our stunning precious stone table tops are handcrafted from the finest gemstone rough raw materials, which are used traditionally only in jewellery. Because these fine gems don't naturally lend themselves to standard table top dimensions, we have developed a special technique that lets us piece them together into a durable mosaic like no other. This product is finished to a mirror polish. Agate is the name given to numerous varieties of banded Chalcedony, a mineral of the Quartz family. Its name comes from the Achetes River in Sicily, where Agates were first found. Greek philosophy described this gem as early as 300 B.C. It was the stone of warriors in ancient times.*

*The famous ancient Egyptian scarabs are made of agate. Usually Agate is banded in layers, or stripes, some varieties have "eye" markings, or specks of colour, some have fossilized inclusions, and others are solid. Called the earth rainbow, the concentric bands of Agate form in nearly every colour the earth can produce, including a colourless form. Agates are grounding stones, bringing about an emotional physical and intellectual balance. They aid in centring and stabilising physical energy. Agate has the power to harmonise yin and yang, the positive and the negative forces that hold the universe in place. A soothing and calming stone, agate works slowly but brings great strength. Its multiple layers can bring hidden information to light.*
